

### *Electronic Answer to Meeting Legal Obligations*

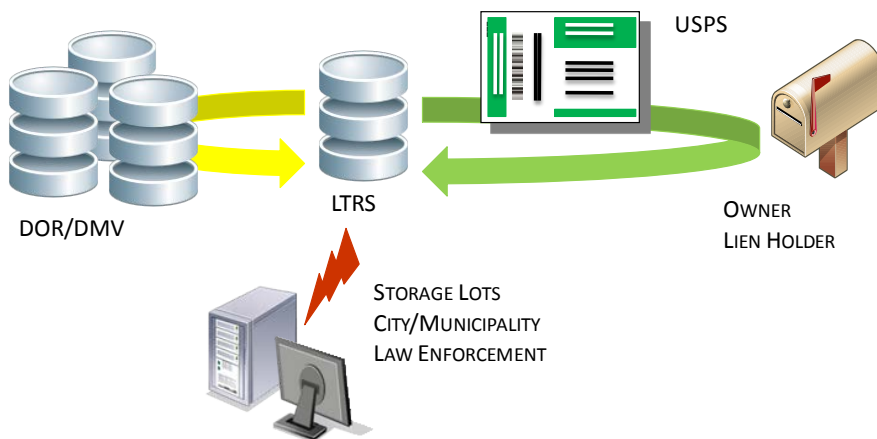

## LTRS – Lowering the cost of Owner Notifications

Is the cost and resources of meeting notification obligations reducing your profitability and diluting business focus? If so, outsource it with DTS's LTRS Owner Notification Service.

LTRS is an affordable, outsourced approach for municipalities or towing operators to meet state guidelines for registered owner and lien holder notification. LTRS eliminates manual, error-prone, paper-based tasks and automates the notification process. LTRS translates directly to bottom line cost savings through lower notification expenses, reduced preparation time and less employee resources.

Owner and lien holder information is sent to LTRS which in turn is automatically merged into your notification letter and electronically archived, eliminating cumbersome paper storage and lowering the potential for legal challenges that result in lost storage revenue, exorbitant fines and license suspension.

Your customized owner notification letters are automatically merged, printed, mailed and tracked through the United States Postal System. Delivery information is emailed daily to you and archived in a searchable, online database.

### Benefits

- Automated merging, printing, preparation and mailing of notification letter
- Electronic letter tracking
- Electronic archiving of letter and delivery information in a searchable database
- ERR-Electronic Return Receipt® for tracking letter through the United States Postal Service (USPS)
